

MEDICAL SERVICE

The Infirmary

The school infirmary is in charge of giving the first aid in case of accident or serious illness, which may occur during the school day. If necessary, the infirmary will contact the parents and, if need be, call an ambulance to take the pupil to the nearest emergency department.

Generally, the hospital to which the pupil will be transferred in case of necessity is the **Delta – Chirec Hospital, 201 Boulevard du Triomphe, 1160 Auderghem, Bruxelles. Emergencies telephone number: 02.434.88.00.**

The school infirmary cannot replace parents in routine care and treatment administration. To allow the nurses to dedicate the appropriate time to children presenting real problems, parents are invited to care for the little discomforts (such as sore throat, canker sores, high temperature, warts, injuries or sprains that have occurred out of school) at home, with their family doctor. Parents are kindly requested to immediately inform the infirmary about any medical problem affecting their child (such as asthma, eyes problems, ear problems, diabetes, etc.). This information should also be mentioned in the pupil's diary, unless confidential.

Infirmary email address: IXL-infirmerie@eursc.eu

Medical service

- Mrs M. CARPENTIER, doctor ☎ 02/629.47.38
- Mrs E. KARATZAS, dentist ☎ 02/629.47.38
- Mme E. RIVAS, M. H. CLAEYS, Mme M. RYSMAN, infirmiers ☎ 02/629.47.38

Within the school medicine framework, pupils will undergo a medical examination during specific school years:

M2

P1, 3, 5

S2, 4, 6

The dates will be communicated to the parents in due course.

The **mandatory medical visit** includes: a measurement of height and weight, a sight test, a hearing test, a urine test and a medical examination (in accordance with the National Belgian Medical School Inspection). A dental examination will be scheduled for 3rd primary classes and 2nd secondary classes.

Vaccinations : The school doctor checks the vaccine status of the pupil. Vaccination cannot be administered at school. To receive a vaccination, please contact your family doctor or pediatrician.

The aim of this examination is to obtain an overall medical and age specific check-up of the pupil, to inform parents, and, if needs be, to propose specific aid in order to promote a better adaptation to school as to family and social life. The medical service has the important function of early detection of physical deficiencies which aim to improve the child's wellbeing at school. The school doctor does not prescribe therapies. Parents who wish to meet the school doctor (between 8.30 and 10.30) are invited to schedule an appointment by calling the infirmary (telephone number : 02/629.47.38).

ECOLE EUROPEENNE DE BRUXELLES III
EUROPEAN SCHOOL BRUSSELS III
EUROPÄISCHE SCHULE BRÜSSEL III

If your child is affected by a chronic or seasonal disease which requires regular medication, please inform by mail the school infirmary about the child's pathology and about the medication that he/she is taking or that has to be administered in case of emergency.

The protocol of the infirmary is available on the website of the European School of Brussels III, eeb3.eu, under the section The school > Our services > Medical service.
